

The intrinsically safe submersible pressure level transmitter is offered in two styles for different liquid types and provides continuous level measurement up to 46' (14m) of water column with a 4-20 mA signal output. Select the LD32 liquid level sensor for dirty, foaming or slurry type liquids. Application examples include municipal sewer or storm pump lift stations.

- Corrosion resistant 316 SS transducer with polyurethane or ETFE cable
- Strong cable design with maintenance free breather \checkmark tube and vent filter
- Rugged clog and damage resistant diaphragm design ~
- Automatic temperature compensation for accurate measurement

Key Benefits

- Ideal for applications with heavy foam and vapors
- Connects directly to PLC/SCADA or display
- 4-20 mA output relation only
- Pressure is not affected by specific gravity

Compatible Products

DataLoop™ IS Level Indicator

Application

Offered in FM and CSA approved intrinsically safe classification, the loop powered level indicator displays engineering units connected in series with one 4-20 mA continuous level transmitter. Select the LI25-2001 level indicator for hazardous applications with an intrinsically safe sensor. For field mount installation, add a single or dual indicator NEMA box.

Notes

1) To install the level sensor through the tank top with a compact junction box, 2" mounting plug and cable connector, order the submersible pressure sensor mounting kit.

2) Add the LB11-1001 intrinsic safety barrier to complete your intrinsically safe level measurement package.
