

Series E14 Hub Shaft

- Easy installation on motor or machine shafts
- Large and small hub availability

MOTOR MOUNT

APPLICATION/INDUSTRY

The Dynapar brand Series E14 Hub Shaft encoder is designed for easy installation on motor or machine shafts. Its hub shaft design and flexible spring mount eliminate the need for a mounting flange adapter and flexible coupler. This not only reduces the encoder depth, but also lowers installation cost.

DESCRIPTION

The Series E14 Hub Shaft includes precision bearings, an O-ring seal, and a selection of bore sizes ranging from 6 mm to 5/8".

Series E14 incorporates the latest in microelectronic packaging, LED light sources, and matched sensors. Outputs are designed to be compatible with most 5V TTL circuits with options for higher voltage 12 and 15 VDC. Shielded cable is standard. A 5V line driver with complementary outputs is available for longer cable runs and higher electrical noise immunity.
