

# Control Disconnect Enclosures C

Stahlin's Control Disconnect Enclosures offer a unique range of product designed around a Type 4X watertight, corrosion resistant vertical disconnect handle. The versatile mechanism functions as a universal linkage compatible with name brand disconnects, circuit breakers and combination starters.

An environmentally sealed vertical disconnect mechanism differs significantly from a rotary through-the-door mechanism. The assembly maintains the complete environmental integrity of the enclosure while it minimizes panel obstruction. The mechanism mounts to the far right side of the enclosure and minimizes the linkage interference with panel mounted components. As a result, competitively priced, commercially available control can be used. Stahlin's unique handle mechanism uses internal cabinet space in the most efficient way possible. The handle mechanism is unchanged, regardless of the capacity of the control. However, five different enclosure sizes are offered to accommodate both small and large control assemblies.

## Control Disconnect Enclosure Attributes

- Environmentally sealed Type 4X disconnect handle
- Safety lock in off position
- Memory retaining polyurethane gasket
- High impact resistance
- 300 series stainless steel
- Stands up to an exceptionally broad range of chemical exposures
- Integral mounting feet
- Molded in panel mounting inserts

# Technical Specifications - Control Disconnect Enclosures

C

*Base configuration (no suffix) - Vertical disconnect handle, without pre-mounted control*

**NOTES:**

**C Construction**

<b>Material</b>	Hot compression molded fiberglass reinforced polyester
<b>Gasket</b>	Poured polyurethane seamless gasket provides watertight, dust-tight environmental seal
<b>Stainless Steel Hardware</b>	300 Series stainless used on all hardware
<b>Molded in Mounting Bosses</b>	Panel mounting capability for fixed rear panel
<b>Metal inserts</b>	All bosses utilize threaded brass inserts
<b>Soft Edge Design</b>	Rounded edges, minimal protrusions or exposed pocket areas for assembly of dust and debris
<b>Latch Material</b>	Glass Filled Polyamide with foam in place gasket
