

DD Series

The Daykin DD Series AC/DC Power Units provide up to three separate isolated outputs in one compact enclosure. This series combines the attributes of a drive isolation transformer, a control transformer and a DC power supply. The standard unit is furnished with a three phase, 480 VAC, 60 hertz input. The three separate isolated outputs are three phase 220 VAC, single phase 120 VAC and 24 VDC. The three phase output is available from 3 KVA through 15 KVA; the single phase output is 600 VA or 1000 VA, and the 24 VDC output is 25 amps or 50 amps.

TD Series

The Daykin TD Series AC/DC Power Units provide two separate isolated outputs in one compact enclosure. This series combines a control transformer with a DC power supply. The standard unit is furnished with a single phase, 480 VAC, 60 hertz input. The two separate isolated outputs are single phase 120 VAC at 1.2 KVA or 2 KVA, and 24 VDC at 15 amps.

Features

- Non-ventilated enclosure with gasketed cover
- 100% copper wound shielded transformer
- Easy access terminals
- High quality bridge rectifier
- DC output full load less than 2% RMS

Options

-  certified **AC/DC Power Units**
- Non-standard voltages/frequency available
