Notes:

2. This model comprises a total of 12 inputs. Input functionality can be adapted as follows:
   8 inputs may be used as digital inputs. They may be wired, in a group, and set to either npn or pnp via a single jumper. 4 inputs may be used as analog inputs, current (AN2-AN5).

   In addition, according to jumper settings and appropriate wiring:
   - Inputs 6 and 7 can function as either digital or analog inputs.
   - Input 0 can function as a high-speed counter, as part of a shaft-encoder, or as a normal digital input.
   - Input 1 can function as either counter reset, as part of a shaft-encoder, or as a normal digital input.
   - If input 0 is set as a high-speed counter (without reset), input 1 can function as a normal digital input.
